

September is National Preparedness Month

The town in conjunction with CT Department of Emergency Management Homeland Security purchased a Reverse 911® system. The system gives responders a way to notify the community in an emergency with a single recorded message to residents and businesses affected. Currently the database for the system contains only listed phone numbers from a commercial source. If you want to submit your unlisted, VOIP, or cellular mobile device phone number click on the link "[Click here to Register Reverse 911](#)" to [learn more](#) about the system.
